

Feedback – Madara Bundle

1. What is the community's opinion about the Madara bundle?

The Madara bundle was one of the most anticipated items of part 2 of the collaboration. The overall reception is extremely positive, with the community highlighting its faithfulness to the anime, the imposing presence of the character, and the quality of the adaptation. Many players consider the bundle “simply perfect” and worthy of the hype that always surrounded Madara, although some mentioned it would have been even more impactful if it had received a transformation.

2. What is the community's opinion about the advantages of the Madara bundle (Med Kit, knockdown, and elimination effects)?

Overall, the effects were well received and seen as an important feature that adds to the skin's imposing presence. The Med Kit effect was considered the most interesting, while the knockdown/elimination effects divided opinions: some found them excellent, others considered them average or repetitive. Some players also argued that Itachi deserved to have had similar effects. In general, these advantages significantly increased the value of the bundle.

3. How interesting is the Madara bundle for the community?

The skin is considered extremely interesting and relevant. Madara is seen as the greatest villain in the anime, with an aura that brings nostalgia, historical weight, and hype to the event. Many players stated that it is “one of the most desired bundles of the entire collaboration,” and even those who are not big Naruto fans recognized the impact and imposing presence of the bundle.

4. What is the community's opinion about the mechanism chosen for Madara (Token Royale)?

This was the most criticized point:

- For some, Token Royale was acceptable, especially with applied discounts, and “worthy” of a skin of this scale.
- For the majority, however, the system was seen as discouraging and expensive, making it very difficult to obtain the skin. Players reported that the cost was too high, with minimal and even unfair chances, which negatively affected the overall experience.

5. Comparing Madara with Sasuke, which one was more relevant?

Opinions were divided:

- Part of the community believes that Sasuke was more relevant since he was released in part 1, at the peak of novelty, which made the event explode and even attracted inactive players back.
- Another part argues that Madara was even more anticipated, being more requested than Sasuke himself, especially due to the character's weight and because he had been highly demanded since the beginning.

6. Does the Madara bundle have any flaws or improvement points that the community would like to mention?

Overall, the skin was considered perfect and without major flaws. Even so, one point was raised: Some felt that the character's model looked "too skinny."
